FORGING FUTURES TOGETHER

Success

Enterprising, creative contributors

Knowledge, innovation and citizenship skills will enable our pupils to be successful in the wider world. This success can be reflected and celebrated in a combination of academic attainment, involvement in enrichment activities and pupil contributions to their community.

At Ysgol Cwm Brombil, you can be successful if you have:

KNOWLEDGE, INNOVATION and CITIZENSHIP

School Context

At Ysgol Cwm Brombil, we have high aspirations and we are committed to providing excellence in education within a safe learning environment where every student has the support they require to be successful. Our vision is to further develop our curriculum, resources and teaching to achieve and sustain excellence. We see our core purpose as providing engaging, exciting and challenging learning opportunities which result in ambitious capable learners, committed to lifelong learning. We aim to develop our students' knowledge, skills and qualities to enable them to be successful, happy, resilient and healthy citizens of Wales and the World.

We continually strive to develop and improve at all levels so that we are the first choice for families and their children, not just for academic success but because we care about every child and will support them to become valued members of a community they actively contribute to.

Our young people demonstrate high quality relationships with us and our wider community. We are committed to sustaining and further developing high quality partnerships so that students develop into enterprising, creative and positive role models for others in our community and beyond.

We are committed to continuously developing a high-quality education profession, where the best teachers and support staff work effectively together, for the ultimate benefit of every student. We believe that we are more than just a school; we provide a home where a broad range of enrichment activities, community activities and educational visits enable young people to gain experiences that may otherwise be inaccessible to them.

Improvement Priorities:

Key Priority 1: Achieve Excellent Standards

Key Priority 2: Provide Outstanding care, support, provision and guidance

Key Priority 3: Developing Inspirational Leadership and teaching
